

TANKERSLEY FOODSERVICE PACKING

To develop true partnerships with our customers we must be able to handle all of your needs. That was the central focal point driving our new 10,000 square foot USDA inspected meat packing facility.

We are excited to announce TFSP is officially open for business and already producing many great protein items for our customers. Fresh burgers, cut

steaks, and pork chops are just some of the products we're making today. Having control of the process from start to finish allows us to produce the product specification YOU determine.

Let us help separate your restaurant from everyone else in town. We want to be your personal cut shop!
